August 2006 Newsletter

This newsletter is the fifth of a series of monthly updates on the UK-ADAPT initiative. It is provided to all registered users on the UK-ADAPT website. Please forward to any colleagues that might be interested in UK-ADAPT and encourage them to use the website.

Overview

Activity has continued on the UK-ADAPT website during August, with some new projects being added and new people registering as potential project leaders, however this has generally been a quiet month as many people have been on holiday.

New Projects

There are 154 projects currently listed on the website. We now have good coverage of projects across different UK regions, but we know there are many more projects out there, particularly in Wales, Scotland and Northern Ireland. Please review all diffuse pollution projects undertaken by your organisation since 2000 and consider registering them on UK-ADAPT. If anyone has a large number of projects to register, please contact Becky Humphrey for assistance on 01954 268267 or uk-adapt@adas.co.uk

Incorrect contact details

Please make sure that you update your contact details if you change jobs, to ensure you are kept informed of UK-ADAPT developments.

Useful Documents

We are aiming to increase the number of articles held in the 'documents' section of the UK-ADAPT website. Reports are placed here that do not relate to projects in the database, but that provide relevant information for UK-ADAPT users. For example, we have just added a review of EU and US catchment projects.

Reminders

Please remember that all UK-ADAPT users can use the website to advertise relevant information on diffuse water pollution from agriculture and catchment management. This includes:

- Forthcoming conferences advertised on the Notice Board
- General articles / reports in the 'Useful Documents' section
- Website Links

Feedback

If you have any comments on the website or require assistance with registering and editing projects or updating contact details, please contact us at uk-adapt@adas.co.uk
