

UK-Adapt Workshop

Catchment Management - Linking water policy, practice and science

Peter Costigan

Defra

UK-Adapt

An initiative by
ADAS, Water UK and UKWIR
with guidance and support from
Defra, EA and Scottish Executive

UK-Adapt Objectives

- To produce an information resource on UK catchment studies about diffuse water pollution from agriculture for Funders, Policy Makers, Researchers and Practitioners
- To review the resource to identify gaps and provide recommendations for:
 - Further work
 - Better Co-ordination
- To improve networking and knowledge sharing between the stakeholders

Scope of interest

Studies relating to diffuse water pollution from agriculture using real data from a UK catchment

Workshop Sessions

Session 1 - Policy context & approaches

Session 2 - Practical case studies

Session 3 - Research perspective
